

# EPIBROW

3D Microblading Available Here

**Epibrow is an innovative new method of depositing pigments into the epidermis. It is done using a very fine blade that impacts colour closer to the surface. The strokes appear crisp and very fine. There is no spilling under the skin just beautiful realistic 3D hairstrokes. This method is ideal for anyone looking to enhance and define the look of their brows.**

Epibrow creates such a natural looking hairstroke, regardless of the amount of hair present on the client. People suffering for alopecia, trigonometric or any other condition that causes hair loss i.e. over plucking benefit greatly from this technique. It is also ideal for people who are not happy with their eyebrow shape.

The pigments used in this method have been formulated to match the original eyebrow colour, even if you still have brows it blends into them. The brows will appear darker but fades significantly over a two week period, therefore it is crucial to have your top-up as it is difficult to predict how the skin will retain the pigment. However a top-up once a year is recommended to retain the shape & pigment colour.

## **COMMON QUESTIONS**

### **Is it Painful?**

No. While there is some discomfort felt, it would not be regarded as pain. A topical anaesthetic cream is applied to numb the area. Small little scratches would be felt.

### **How long does it last?**

The treatment will take approx 2 hours. Your technician will analyze your face and go over the best brow shape that is suitable for you. Your input is essential at this stage as you both agree on shape and colour.

### **What can I expect on the day of the treatment?**

First of all your features will be analyzed and from there your technician will make recommendations based on shape, colour and design, best suited for yourself. Once the design has been agreed the procedure

will take place. Some redness may be experienced after the treatment. You will leave with all the after care knowledge.

### **How do you choose design and colour?**

Your technician has been trained to the highest level in colour mixing & shaping & will devise a bespoke brow suited to yourself.

### **Health & Safety?**

All technicians are trained to the highest level in infection control etc. Strict patch tests will always be carried out 48 hrs before treatment. Single use needles will be used and disposed of following strict guidelines. Do not worry you are in safe hands!!!
